

Portal Evropskega oblaka odprte znanosti

<https://www.eosc-portal.eu/>

23. novembra 2018 je bil v okviru avstrijskega predsedovanja Svetu Evropske unije [v javno uporabo predan portal Evropskega oblaka odprte znanosti](#) (European Open Science Cloud, EOSC).

EOSC je federacija evropskih računalniških zmogljivosti, digitalnih infrastruktur in zbirk s [FAIR](#) raziskovalnimi podatki.

Dodatne informacije so navedene v sporočilu za javnost na koncu tega dokumenta oziroma na Portalu EOSC.

Predlagamo tudi seznanitev z naslednjimi povezanimi informacijami:

- deklaracija [The Vienna Declaration on the European Open Science Cloud](#),
- predstavitev [European Open Science Cloud getting real: policies to launch EOSC and its governance structure](#),
- poročilo [Prompting an EOSC in practice](#),
- poročilo [Turning FAIR into reality](#).

**EUROPEAN OPEN
SCIENCE CLOUD**

Release date : 23 November, 10:00 CET

23 November 2018, VIENNA, AUSTRIA: The European Open Science Cloud (EOSC) is officially launched today, 23 November 2018, during an event hosted by the Austrian Presidency of the European Union. The inauguration marks the conclusion of a long process of consultation and reflection with stakeholders led by the European Commission.

The event demonstrates the importance of EOSC for the advancement of research in Europe and introduces the new [EOSC Portal](#).

The EOSC Portal provides access to data, services and resources. It is a source of up-to-date information about the EOSC initiative, including best practices, governance and user stories.

All service providers, research communities and other entities with a stake in EOSC are invited to visit the EOSC Portal and explore how they can benefit from its functionalities.

The launch event features live demonstrations to showcase how researchers can interact with and benefit from the functionalities of the portal. The demonstrators, presented live and at the demo booth, cover a wide range of disciplines and user scenarios to show the many different user journeys through the portal.

The scientific demonstrations are complemented with the presentation of the newly appointed EOSC Executive Board.

Information for editors:

More about the EOSC Portal

website: www.eosc-portal.eu

twitter handle: @eoscportal

[youtube channel](#)

The EOSC Portal is the first step towards the EOSC implementation, putting into practice the European Commission's vision for Open Science. It brings convergence to a fragmented research ecosystem and fosters FAIR rules of participation.

The portal is a universal entry point to the services, data and resources that researchers need to perform their science in a collaborative, open and cost-efficient way for the benefit of society and the public.

The EOSC Portal is jointly developed and maintained by the eInfraCentral (731049), EOSC-hub (777536), EOSCpilot (739563) and OpenAIRE-Advance (246686) projects funded by the European Union's Horizon 2020 research and innovation programme with contribution of the European Commission.
